

Tennessee Drought Update

For the assessment period ending July 25, 2023

Statewide Condition Summary

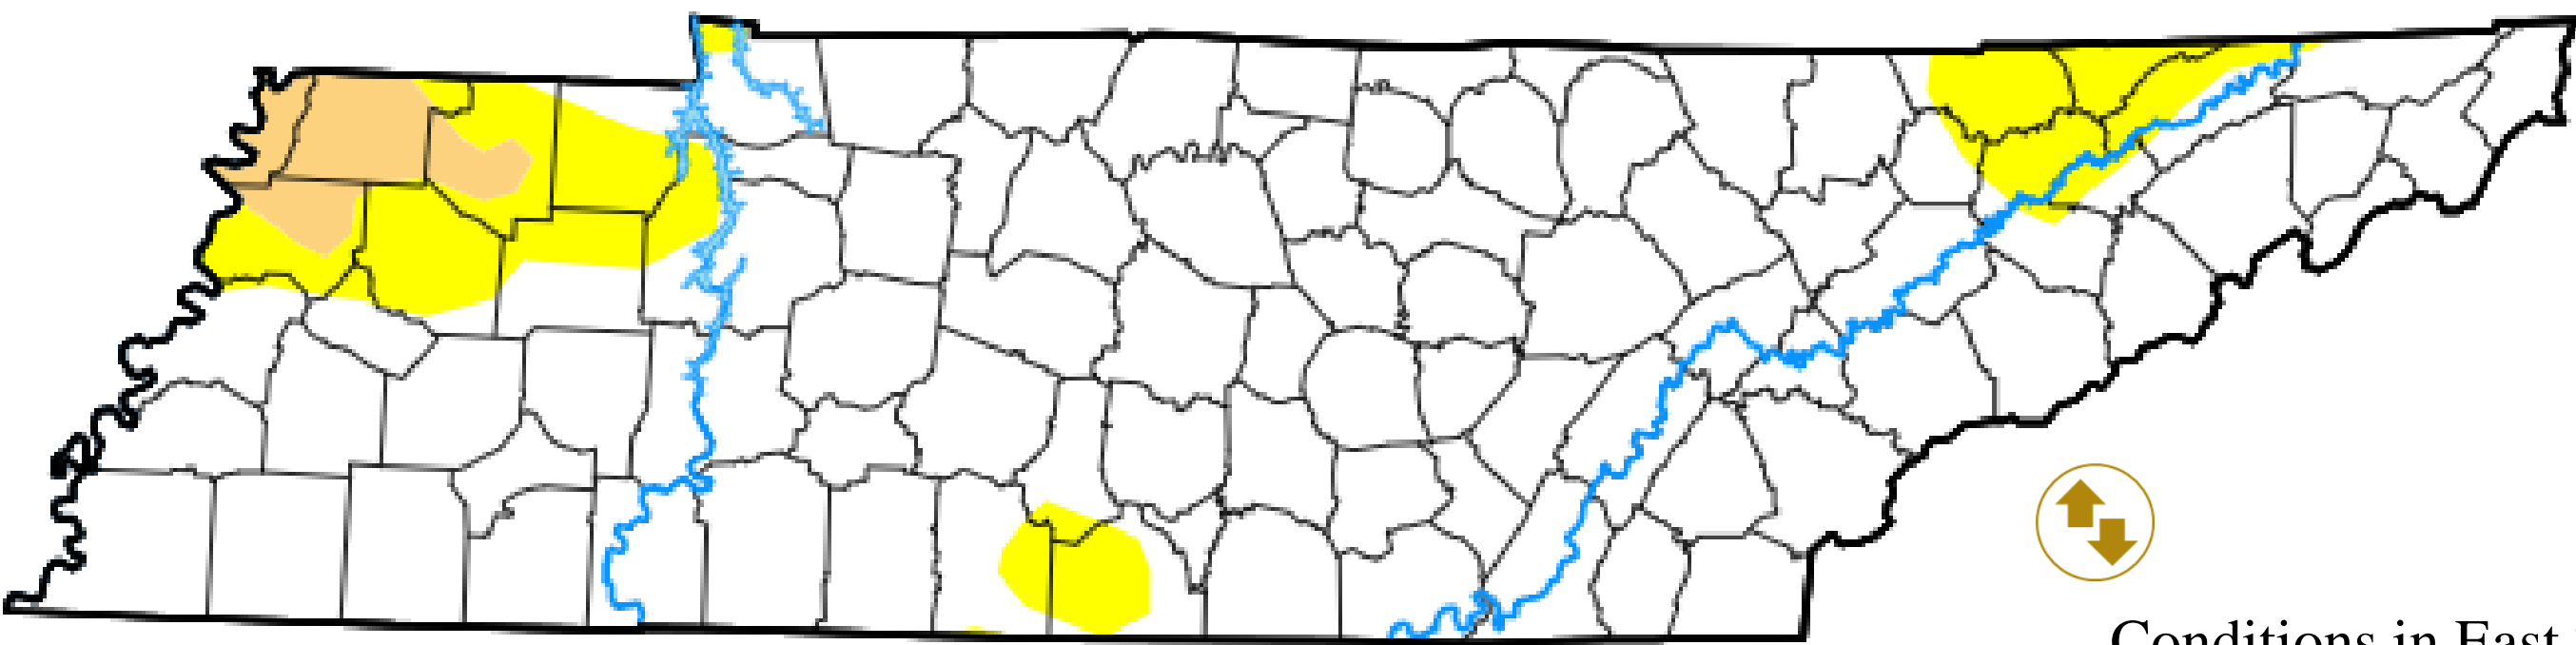

This Week's Drought Monitor of Tennessee Map

From the US Drought Monitor, authored by Brian Fuchs, National Drought Mitigation Center with input from the Tennessee Climate Office

What's Changed? With rain amounts and temperature remaining steady across the state over the last drought monitoring period (Tuesday to Tuesday), conditions have improved across most of Middle and West Tennessee.

What's New? With conditions improving across the state, we see 1 and 2 class improvements across Middle and West Tennessee. With conditions remaining steady in East Tennessee.

What's Next? With rain in the forecast for this week's drought monitoring period (Tuesday to Tuesday), both 1 class improvements and degradations may occur across the state.

 Conditions in West and Middle Tennessee have improved for this week's drought monitoring period (Tuesday to Tuesday). With 1 and even 2 class improvements.

 Conditions in East Tennessee remain steady for this week's drought monitoring period (Tuesday to Tuesday).
