

Tennessee Drought Update

For the assessment period ending August 01, 2023

This Week's Drought Monitor of Tennessee Map

From the US Drought Monitor, authored by Brian Fuchs, National Drought Mitigation Center with input from the Tennessee Climate Office

Conditions in West and Middle Tennessee have remained steady for this week's drought monitoring period. With very small 1 class improvements in northwest Tennessee.

Conditions in East Tennessee worsened slightly, with some D0 expansion.

Change Since Last Week
