

Tennessee Drought Update

For the assessment period ending January 16th, 2024

This Week's Drought Monitor of Tennessee Map

From the US Drought Monitor, authored by Adam Hartman, NOAA/NWS/NCEP/CPC with input from the Tennessee Climate Office

Recent rainfall leading to 1 category improvements in northwest Tennessee and the mountainous area of southern Blount/Sevier/Monroe counties.

Change Since Last Week

Statewide Condition Summary

What's Changed? Similar to last week, all parts of the state received at least ~0.5" of rain during the drought monitoring period (Tuesday to Tuesday), with some areas receiving over 3" of rain in East Tennessee. This resulted in most of the state seeing 1-class improvements and no areas of degradation.

What's New? Multiple counties across Middle and West Tennessee saw 1-class improvements from Extreme Drought (D3) to Severe Drought (D2) – a reduction of over 18%. All of northeast Tennessee is now drought-free, although still rated as Abnormally Dry (D0).

What's Next? Additional precipitation (possibly snow/freezing rain) is expected over the next drought monitoring period, especially in East Tennessee. This may result in additional improvements for this region, but Middle and West Tennessee may see no changes – many of these areas are still experiencing snowmelt from the winter storm (1/15-1/16).

Statewide Coverage By Category

Category	Coverage This Week	Change Since Last Week
D0: Abnormally Dry	26.74%	+20.82%
D1: Moderate Drought	24.16%	-1.69%
D2: Severe Drought	25.51%	+0.43%
D3: Extreme Drought	22.04%	-18.54%
D4: Exceptional Drought	1.54%	-1.03%
