Panopto Soon to Be Available as a Replacement for Tegrity Lecture Capture

ETSU now offers Panopto to all faculty and staff. Panopto is an industry leader in video management and recording software. Integrated with D2L, this platform will be replacing Tegrity for lecture capturing opportunities, as well as adding additional services that are available for teaching and learning. In particular, Panopto features automatic closed captioning for videos to ensure accessibility standards are being met. With this software:

- Faculty and Staff can record lectures in the classrooms or from their computer(s),
- Create interactive videos,
- Upload existing videos into courses seamlessly,
- And because the videos are accessible, students can easily search for any word that is spoken, captioned, or seen on the screen in a video

Academic Technology Services and Information Technology Services will be hosting a live, via Zoom, training on July 6th, 2020 for any faculty and/or staff that are interested. Additionally, if you are unable to attend the live session, the training will be recorded and made available to those that register or request it. In order to sign up for the training, or to be put on the list for the recording, please complete the form at: tinyurl.com/y994qkvt. Additionally, for resources, guides, tutorials, and more please reference the Information Technology Services Help Desk website for Panopto.
