

## Security Awareness Training Available for 2021

Ransomware, phishing, and spyware are just some of the ways that attackers attempt to gain access to confidential information and weaken the integrity of our organization. The State of Tennessee mandates that all ETSU employees must complete annual security awareness training. Security awareness training is now available for employees to complete within the next 45 days. Email notifications will be sent to employees until the training has been completed. Information Technology Services (ITS) is working with KnowBe4 to provide security awareness training. You will be redirected to their website where you can safely enter your ETSU email address and password.

Get a jump on the fall semester and complete your training now! Access the ITS security awareness website and begin learning how to protect yourself and ETSU from cybercriminals: <https://www.etsu.edu/its/security/training.php>. Questions related security awareness training may be directed to [ITS@etsu.edu](mailto:ITS@etsu.edu).
