*Practicing Photography" Course Description: The course is devoted to looking at, responding to, and understanding student work in a variety of photographic forms. Among those approaches might be digital images, analog (film) photographs in color or black and white, alternative processes, documentary photography, studio photography, cell phone imagery, constructed images, or other means. This class emphasizes concepts, direction, and resolve in each student's photographic work.*

*Since the Bronze Age, public monuments have played a critical role in preserving and shaping social memory. Yet, monuments are motivated; their (visual) narratives are carefully constructed to serve the needs of their commissioners. Because of this, monuments are complex sites of (un)remembering, revisionism, and resistance. Through select case studies drawn from a diversity of historical periods and global cultures (e.g., the Stele of Naram Sin, the Parthenon, the Jerusalem Temple Mount/Haram al-Sharif, Confederate monuments, Memorial to the Murdered Jews of Europe), students will consider the dynamic relationship between monuments and memory. Particular attention will be paid to the "social biography" of monuments, tracing their forms and meanings over time.*

Other requirements will be addressed by the instructor. The lab portion is included in this course. You are not required to register for a separate BIOL 1021 co-requisite. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL 1020.

Special Topics: Machine Learning Prerequisite: Linear Algebra or permission of instructor. This course provides a broad introduction to modern machine learning topics. Machine learning is the science of getting computers to act without explicitly being programmed. Topics include: i) Supervised learning ( Linear regression, Logistic regression, SVM, Neural Networks) and ii) Unsupervised learning (clustering, dimensionality reduction, recommender systems ). In addition, application of machine learning algorithms will also be covered.

*Note: The 12 hour field placement component of EDFN 2400 requires an ETSU specific background check PRIOR to the first day of class. You may get information on this process including details about fingerprinting locations on the Clemmer College, Teacher Education website or by stopping by 321 Warf-Pickel and asking for more information. All candidates are advised that progression through the teacher education programs of study requires specific test scores and grade criteria. Please see your the Clemmer College catalog or speak with an advisor for more information.*

*Beginning with questions of genre more broadly, this course will trace the evolution of the western genre from early cinema to contemporary examples. We will examine westerns from America and around the world to consider how the western is shaped by history, politics, and culture. Through screening films and reading texts drawn from Latin America, Europe, Australia, and East Asia, we will consider the interrelation of national and global factors that have led to the emergence and the adoption of the western as a popular genre. Films screened may include: My Darling Clementine (John Ford, 1946), Django (Sergio Corbucci, 1966), The Ballad of Little Jo (Maggie Greenwald, 1993), and Brokeback Mountain (Ang Lee, 2005). Films will be screened Wednesdays at 4:40pm.*

ENGL-4290-001	Film Genres: The Western	83085	3	TR	11:15 AM	12:35 PM	A014	402	WESSELS	LILA	23	17	6	Y

*The video essay has emerged as a popular critical form with the rise of screen communication via hosting sites like YouTube and various forms of social media. Video essays often dissect films, television, video games, or other media, using their own images and sounds reconfigured to make an argument about them, while others creatively highlight themes and ideas through remixing the material. More recently, video essays have been accepted as a critical form of scholarship, peer-reviewed and published by digital journals. We will study the proliferation of methods, types, and styles of this new form of critical audio-visual composition and build the skills to create our own. No previous production experience is required, but through this course you will learn the principles of editing video using Adobe*

Premiere. By the end of the course you will create a video essay that contributes to this growing field of practice.

This course will explore the convergence of twentieth-first century narrative and technology. We'll look at the ways in which the novel has enlarged and redefined its territory of representation and its range of technique and play, while maintaining its viability in the new media ecology. Through theories of cybernetics, we'll be analyzing the relationship between print texts and electronic media, including novels incorporating technology, films engaging the interface between human and machine, and digital storytelling. We'll engage in media-specific analysis, which attends to the specificity of form as well as to citations and imitations of one medium in another, and finish the course by producing critical or creative technotexts that engage with the interface between written work and screen technologies.

ENGL-4910-001	Ind Stdy: Second Language	85910	3	TBA					MCGARRY	LILA	0	1	-1	Y

This course will explore the literature of King Arthur from its origins in Celtic poetry and Latin histories to its major expressions in the French, German and (especially) English romances of the high and later Middle Ages. Texts from the ninth to the fifteenth centuries will be read mostly in translation, though we will engage with the anonymous Alliterative Morte Arthure and Sir Thomas Malory's Morte Darthur in the original Middle English. We will observe the continuities (the love between Lancelot and Guinevere, for example, and the Grail legend) which allow this set of texts to cohere as a tradition, but also the ways in which these continuities are troubled (as in Sir Gawain and the Green Knight) by changing responses to that tradition. We will also consider modern interpretations including Wagner's Tristan und Isolde and Parsifal as well as several cinematic treatments of the Arthur story: John Boorman's Excalibur; Terry Gilliam's Monty Python and the Holy Grail; and Gilliam's The Fisher King. This course may also count as an elective for the Classical Studies Minor.)

## Mathematics

### First 7 Week

Course ID	Title	CRN	Credits	Days	Start Time	End Time	Building	Room	Instructor	Department	Max Enrollment	Actual Enrollment	Seats Left	Gradable
-----------	-------	-----	---------	------	------------	----------	----------	------	------------	------------	----------------	-------------------	------------	----------

*NOTE: MATH 1710-FD1 meets the first seven weeks of the term (August 26-October 9) and has required in-person meetings twice per week. This section has a substantial technology-based component. Students must have regular internet access. Examinations will be proctored at the Testing Center, on the first floor of the Sherrod Library. Students must do preparation work prior to each in-person meeting, including but not limited to reading materials, watching video lectures, and participating in online discussion boards. This is often known as a "flipped classroom." This section, along with MATH 1720-FE1,*

is ideal for students who want to take their entire precalculus sequence in one semester.

MATH-1710-FD1	Precalculus I (Algebra)	83211	3	TR	02:15 PM	03:35 PM	A010	314	MCGILL	MATH	35	19	16	Y

*NOTE: MATH 1720-FE1 meets the last seven weeks of the term (October 21-December 6) and has required in-person meetings twice per week. This section has a substantial technology-based component. Students must have regular internet access. Examinations will be proctored at the Testing Center, on the first floor of the Sherrod Library. Students must do preparation work prior to each in-person meeting, including but not limited to reading materials, watching video lectures, and participating in online discussion boards. This is often known as a "flipped classroom." This section, along with MATH 1710-FD1, is ideal for students who want to take their entire precalculus sequence in one semester.*

*SOWK 4957-001 Special Topic: "Systematic Review: Use of Text Messaging in Behavioral Health" Course Description: This independent study will encompass the beginning stages of a systematic review that will result in a manuscript submission. The student will be instructed on how to conduct a systematic review and be guided to complete the literature review across identified databases. The student will also participate with the instructor in the abstract review and selection of articles to be included and the conceptualization of the article. Time permitting, the student will also participate in data extraction stage. The student will earn co-authorship on the article for this work.*

*SOWK 4957-501 Special Topic "Child Trauma and Policy" Course Description: This course provides an overview of child trauma and information about the child welfare system, including the history, policies, and programs, both state and federal, pertinent to child maltreatment. Foster care and adoption policies will be a particular area of focus. Policies, programs, and services relevant to child/youth mental health and juvenile justice will also be examined. Historical and current issues of discrimination and oppression in the child welfare system will be explored, and approaches to advocating for children and families from a social justice perspective will be highlighted.*

*SOWK 5957-500 Special Topics "Child Trauma & Policy" Course Description: This is the first in a series of two child welfare courses. The course introduces students to knowledge of the child welfare system, describing the history, policies, and programs, both state and federal, pertinent to child maltreatment, intervention with families in crises, foster care and adoption services. It is intended to provide a foundation in the knowledge about policy and the values necessary for professional child welfare practice, as well, as preparing students for the second course in the series, Child trauma & Welfare: Skills for Solutions and Permanency for Children and Families. Although the course is designed to meet the needs of students planning to work in children's services, this elective may be taken by other undergraduate and graduate students who believe the content will enrich their preparation to work in other settings. The course objectives are designed to reflect the values, knowledge and skills of the social work profession and the guiding principles of the child welfare model.*

*SOWK 4957-802 Special Topic "Mental Health Concepts " Course Description: The course is designed as an introduction to the major concepts of mental health. The purpose of the course is to provide an overview for students considering an internship or job that involves working with persons with mental illness. It is also designed for students considering graduate education in a discipline involving clinical practice. The primary areas of focus are: major categories of mental illness, regions and workings of the brain, major therapeutic treatment approaches to mental illness, and major pharmacologic treatment approaches to mental illness.*

<i>SOWK 4957-801 Special Topic "Life Skills Development" Course Notes: This is a Hybrid Course. Hybrid courses are structured for half of the course being taught in the classroom with the other half being online. The time for the following class is 5:00 pm -7:50 pm. The dates for the class are as follows: Aug 26, Sep 9, Sep 23, Oct 7, Oct 21, Nov 4, Nov 18, Dec 2. The purpose of a hybrid course is to take advantage of the best features of both face-to-face and online learning. This course is designed to outline the skills and tools necessary to help students teach consumers four skills training modules: Core Mindfulness Skills, Interpersonal Effectiveness Skills, Emotional Regulation Skills, and Distress Tolerance Skills. After completing this course and an undergraduate degree, students will be qualified to lead a skills training group. Taking this course will provide students with numerous tools and handouts to give to consumers struggling with issues such as: low self-esteem; lack of boundaries; negative thinking; poor decision making; inability to cope with emotions such as anger, anxiety, shame, guilt, and fear; lack of self-respect; unhealthy relationships; limited coping skills; the struggle to accept reality; and so much more. This course will use the Skills Training Manual for Treating Borderline Personality Disorder by Marsha Linehan to guide students through learning skills. The Skills Training Manual will help students build their repertoire of resources for consumers through the numerous handouts and worksheets provided in the Skills Training Manual. This course will use educational videos, discussion boards, handouts, worksheets, and skill building exercises so students will become familiar with these skills and how to teach them.</i>

*SOWK 5957-580 Special Topics "Child Trauma & Policy" Course Description: This is the first in a series of two child welfare courses. The course introduces students to knowledge of the child welfare system, describing the history, policies, and programs, both state and federal, pertinent to child maltreatment, intervention with families in crises, foster care and adoption services. It is intended to provide a foundation in the knowledge about policy and the values necessary for professional child welfare practice, as well, as preparing students for the second course in the series, Child trauma & Welfare: Skills for*

*Solutions and Permanency for Children and Families. Although the course is designed to meet the needs of students planning to work in children's services, this elective may be taken by other undergraduate and graduate students who believe the content will enrich their preparation to work in other settings. The course objectives are designed to reflect the values, knowledge and skills of the social work profession and the guiding principles of the child welfare model.*
