BY PERMIT ONLY AND NO ACCOUNTING MAJORS. Course meets asynchronously online. Testing will be conducted live, on campus or at an approved proctoring site for those students located out of the region. Students will need to have a reliable computer and internet access to complete course requirements. For further information, contact the instructor. Preference will be given to students taking classes 100% online.

Using mostly contemporary artists/photographers as examples, this class explores the visualities of landscapes impacted and altered by human, natural, and unnatural forces and investigates related themes such as environmentalism and cultural commentary. Examples of artists could include Robert Adams, Bernd & Hilla Becher, Richard Misrach, Subhankar Banerjee, Catherine Opie, and Patrick Nagatani. Students would apply these techniques and methods to their own work in a series of guided photo assignments and a final, self-directed photo project. All student work would be discussed in peer-

to-peer and instructor critiques.

Transcendentalism and related themes have seen a resurgence in recent years in art and beyond. This course traces connections between unseen worlds and the world around us (nature) in relation to art and artistic practices. Students will develop an understanding of how some artists and thinkers have approached existential questions outside of traditional spiritual constructs through touching on a number of concepts including Visionary Art, Botanical & Scientific Illustration, Mysticism, Theosophy, Alchemy & Hermeticism, Automatism, Thelema, Landscape Painting, Astrology, Divination, the Symbolist Movement, and Queering (in art and beyond). We will consider artists and thinkers from Agnes Pelton to Walt Whitman to Aleister Crowley, along with contemporary artists like Inka Essenhigh, Theodora Allen, and Louie Hollowell- to name just a few. The semester will comprise two main currents: one will be direct observation and depiction of nature through illustration of natural objects and landscape studies; the other will be the bending of nature through various interventions, inventions, and intentional ritual studio practices. By the end of the semester, each student will develop and complete a self-guided series of related transcendental paintings. Materials and media for these works will vary depending on the project and on the unfolding direction of each student's area of interest and evolution during the semester. Note: We will be meeting off campus from time to time to do plein-air studies outdoors, so students will need reliable transportation.

****BIOL 1010-900 is an ONLINE course offered through the ETSU Biological Sciences Department and REQUIRES A PERMIT to register. Send permit requests along with your E# and course CRN to youngtl@etsu.edu. PLEASE BE SURE TO ALSO REGISTER FOR THE CORRESPONDING ONLINE LAB SECTION, BIOL 1011-900, CRN 14476, WHICH WILL ALSO REQUIRE A PERMIT. **** Students will not be required to meet on campus or online at scheduled times. A distance learning laboratory kit is required, and it will be provided by your instructor at no extra charge. For minimum system computer requirements and additional information, please go here: https://www.etsu.edu/onlinehelp/student_help/tech_resources.php (you will need to copy/paste the link). Please be advised you will be responsible for watching/listening to lectures on D2L and completing assignments and assessments by the posted deadlines for each. You will be required to submit electronic photos of yourself performing the home-based lab exercises in order to receive full credit. Other requirements will be addressed by the instructor. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL 1010. ****Textbook required for the online BIOL1010 or BIOL1020 is different from the on-ground courses BIOL1010 or BIOL1020 courses. If you plan to use the same book, be advised to take both the courses as online or on-ground.**

****BIOL 1011-900 is an ONLINE LAB offered through the ETSU Biological Sciences Department and REQUIRES A PERMIT to register. Send permit requests along with your E# and course CRN to youngtl@etsu.edu. PLEASE BE SURE TO ALSO REGISTER FOR THE CORRESPONDING ONLINE LECTURE SECTION, BIOL 1010-900, CRN 14475, WHICH WILL ALSO REQUIRE A PERMIT. **** Students will not be required to meet on campus or online at scheduled times. A distance learning laboratory kit is required, and it will be provided by your instructor at no extra charge. For minimum system computer requirements and additional information, please go here: https://www.etsu.edu/onlinehelp/student_help/tech_resources.php (you will need to copy/paste the link). Please be advised you will be responsible for watching/listening to lectures on D2L and completing assignments and assessments by the posted deadlines for each. You will be required to submit electronic photos of yourself performing the home-based lab exercises in order to receive full credit. Other requirements will be addressed by the instructor. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL 1010. ****Textbook required for the online BIOL1010 or BIOL1020 is different from the on-ground courses BIOL1010 or BIOL1020 courses. If you plan to use the same book, be advised to take both the courses as online or on-ground.**

A study of the military aspects of the deadliest war in human history. We will examine the causes, actions, and effects of the war; the doctrine and tactics used by the forces that waged the war; and the leaders, technologies and organizations that enabled those forces. This course covers the inter-war period and World War II, 1939 to 1945; is divided into three periods, the European War (1939-41), the European War (1941-45), and the Pacific War (1941-45) with individual lessons devoted to peripheral operations or campaigns. The course is primarily a study of the military conduct of World War II and we will study, analyze, and discuss both the actual campaigns of the war as well as the evolution of military capabilities that enabled those campaigns. Political, social, diplomatic, and cultural aspects of the war are examined only in relation to the military conduct of war. There will be four short papers and no final exam.

HIST-3950-001	Sp Top in History: Military	14109	3	TR	08:35 AM	09:55 AM	A021	101	Class	DONNELLY	HIST	30	32	-2	Y
---------------	-----------------------------	-------	---	----	----------	----------	------	-----	-------	----------	------	----	----	----	---

A study of the operational- and tactical-level aspects of the American Civil War. Our focus is on the most significant campaigns and battles of the War. We will first consider the military forces of both sides in terms of strategy, doctrine, tactics, organization, equipment, logistics, and leaders. Then, we will briefly consider military principles of war and forms of maneuver to enable an analysis and evaluation of the actions and outcomes of military operations. The bulk of the course will be devoted to studying and analyzing the conduct of 23 different campaigns and battles; and identifying causes and explanations for their outcomes and consequences. There will be four short papers and no final exam.

---------------	------------------------------	-------	---	---	----------	----------	------	------	-------	---------	------	----	----	---	---

This is an hybrid learning class. There are land surveying labs associated with this class. Lecture and exams for this section will be administered online and the lab component of the course will be onsite. Students have the ability to come to campus and make arrangements with the instructor to perform lab assignments, unless they identify and get approval for a mentor to proctor lab assignments off-campus. The mentor must be a licensed land surveyor that has access to industry standard land surveying equipment. Other requirements will be addressed by the professor. Contact the course instructor for questions or to make special arrangements.

NOTE: THIS COURSE WILL BE AT OUR DOWNTOWN LOCATION AT 101 E MARKET ST, JOHNSON CITY Course description: The Cell Biology course will explore the complex structures and functions of the cell, from the molecular level of organelles to intercellular interactions. Topics covered include nuclear organization and function, mitochondrial bioenergetics, and the dynamic properties of the cytoskeleton. Furthermore, the course will investigate mechanisms of membrane transport, signal transduction pathways, and the regulation of cell growth and programmed cell death. A thorough understanding of these fundamental cellular processes will provide insights into the origins of life, the pathogenesis of disease, and the development of potential therapeutic interventions. Required Textbooks (students are expected to acquire both texts, or at minimum, one of the following): 1) Alberts et al., Molecular Biology of the Cell, 7th Edition, 2022 (W.W. Norton & Co). 2) Lodish et al., Molecular Cell Biology, 9th Edition, 2021 (MacMillan Learning).

NOTE: THIS COURSE WILL BE AT OUR DOWNTOWN LOCATION AT 101 E MARKET ST, JOHNSON CITY ***Course Description: Protein self-assembly: relevance to diseases, functions, and applications. This course explores the mesmerizing world of protein self-assembly, exploring how these tiny molecules orchestrate complex biological functions and potentially contribute to diseases. We will uncover the fundamental principles governing how proteins spontaneously assemble into intricate structures, driving essential processes like cell division and movement. We will also investigate the phenomenon of protein aggregation, where these self-associations can have either beneficial or detrimental effects on living organisms. The course culminates in examining the exciting potential of

<i>harnessing protein self-assembly for novel applications.</i>
